## EDUCATION

**Vidyavardhini's College of Engineering and Technology** 2024 – Present  
*Bachelor of Engineering in Artificial Intelligence and Data Science · University of Mumbai*  
CGPA: **9.1 / 10** | Coursework: Mathematics & Statistics, DBMS, Deep Learning, Big Data Analytics, Data Warehousing, IoT

## INTERNSHIPS

**Data Analytics Intern** Jan 2025 – Mar 2025  
*Godrej Industries Ltd. · Mumbai, India*

- Analysed large-scale sales and supply-chain datasets using Python (Pandas, NumPy) and SQL to surface actionable business insights.
- Built interactive Power BI dashboards tracking KPIs — revenue, inventory turnover, and regional sales — for senior stakeholders.
- Automated ETL pipelines to reduce manual data-cleaning effort by ~40%, improving reporting cycle time.

**AI and Data Skilled Intern** Virtual Internship  
*Mumbai, India*

- Implemented ML algorithms (Linear/Logistic Regression, Decision Trees); performed data cleaning and preprocessing.
- Developed Python scripts for automated data handling and pipeline execution.

**Data Science & Deep Learning Intern** Jun 2023 – Jul 2023  
*Fellowship, VCET · Mumbai, India*

- Performed EDA with Pandas, Matplotlib, Seaborn; developed CNN and RNN/LSTM models using TensorFlow/PyTorch.
- Applied transfer learning (VGG, ResNet, BERT) on limited datasets to improve model accuracy.

## PROJECTS

**DVH Travel Planner**  
React Native · Flutter · JavaScript · Dart  
Cross-platform mobile app with hotel recommendation engine (budget, location, user type), structured navigation, and user-centric UI.

**Amazon Sales Dashboard**  
Python · Power BI · Pandas  
Interactive Power BI dashboard visualising KPIs (Sales, Profit, Quantity) with slicers for region, category, and time-series trends.

**Nextus – Financial SaaS Platform**  
RESTful APIs · JWT · RBAC · Next.js  
Modern banking platform with multi-account aggregation, real-time transactions, fund transfers, and role-based access control.

**Uber Data Analysis**  
Python · Streamlit · Matplotlib · Seaborn  
End-to-end analysis pipeline with automated ETL, modular deep-learning encapsulation, and documented Jupyter notebook.

## SKILLS

|                         |                                                                              |
|-------------------------|------------------------------------------------------------------------------|
| <b>Programming</b>      | Python, SQL, JavaScript, HTML/CSS, Java, C                                   |
| <b>Frameworks</b>       | Streamlit, Flask, Next.js, React.js, React Native, Flutter                   |
| <b>Libraries</b>        | Scikit-Learn, Pandas, NumPy, Matplotlib, Seaborn, TensorFlow, PyTorch        |
| <b>Tools &amp; Misc</b> | MySQL, Microsoft Azure, Power BI, Tableau, Git, Microsoft Office             |
| <b>Soft Skills</b>      | Strong Communication, Teamwork, Documentation, Content Writing, Adaptability |

## AWARDS & ACTIVITIES

|                                                                                                                              |                                                                                                                                                    |                                                                                                           |
